

MINOR IN ACCOUNTING

This program is designed to provide undergraduates with a focused exposure to a particular area of business practice rather than the broad exposure of the general business minor. It can provide professional and technical skills needed for entry into business employment for non-business majors or serve as an alternative to a double major for business majors wishing expertise in a second field.

Anyone seeking to pursue a business career should understand accounting, the "language of business." This program will provide a general business background and give sufficient depth in accounting to qualify graduates for a broad range of positions requiring special competence.
