1. APR may increase or decrease after consummation. Consummation occurs upon disbursement of loan proceeds. The interest rate is variable and can therefore increase and/or decrease over the life of the loan.

2. The automatic payment is a requirement to be qualified for the interest rate reduction benefit. If the auto payment feature is canceled, the rate reduction benefit is lost.

Note: Program rules and qualifications are subject to change at any time. Subsequent changes, however, will not affect loans already qualified for savings programs.
