

Online Access to Class Materials

San Francisco State University currently uses a campus wide state of the art Learning Management System (LMS) which allows students and faculty access to learning materials via the Internet anytime, anywhere, on any connected device. ITEC courses use the LMS to:

- Provide comprehensive learning materials
- Support fully online learners with a live virtual classroom and recorded archives
- Share online resources
- Facilitate student interactivity and collaboration
- Assess student performance and gather student feedback

the future of learning

**SAN FRANCISCO
STATE UNIVERSITY**

San Francisco State University welcomes professionals to experience ITEC, an innovative Masters and Certificate program in Instructional Technologies and Design.

Discover ITEC

The SFSU ITEC program offers an enriching experience for individuals interested in learning techniques on how to systematically develop instruction for classrooms, training workshops, print delivery, or any other setting where people need to learn. Students produce portfolio quality projects that may include instructional software, videos, or web and print-based instruction.

Highlights

- Many classes available in HyFlex
- Online access to class materials
- Evening and summer classes
- On campus Mac and PC computer labs
- Accomplished instructors
- Diverse student population

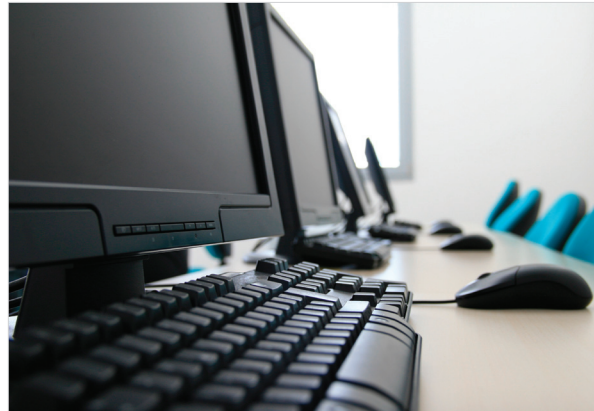

Can't meet face to face in the classroom every week? Try **Online/HyFlex** courses.

HyFlex = Hybrid + Flexible

HyFlex Courses

In a HyFlex course, students enroll in a regular class (not usually listed as an online class in the registration system) and communicate their participation desires to the instructor.

Each week, the instructor provides options for both in class and online participation. Students have the option to complete class activities in a way that meets their participation needs.

Many students still choose to come to class every week, but most also choose the online mode at least once during the semester to accommodate their fast-paced life or work requirements. Whether online or in-class, with HyFlex, students get to choose.

Degree & Certificate

The Department of Instructional Technologies offers the following post-baccalaureate degree programs:

1. Master of Arts in Education (M.A.) with Concentration in Instructional Technologies
2. Graduate Certificate in Training Systems Development
3. Credential Supplement in Instructional Computing for K-12 teachers
4. E-Learning Certificate Program through the College of Extended Learning
