# How to Create a KidPix SlideShow

A KidPix slideshow is a collection of KidPix pictures is a prearranged sequence. You can set timing and transitions between pictures. Quit Kid Pix * and open the Slide Show program * which is located in the Kid Pix folder.

1. Preparing and Saving Your Pictures

Create a folder on the Desktop to hold all your *KidPix* picture files.

Name the folder. Example: "KPPictures"

Create your pictures/slides in *KidPix.*

If there is sound to record, wait and record sounds within the slide show program.

Save each picture with a unique name to the folder: "KPPictures

2. Start the SlideShow Program

Open *KidPix Studio.*

Select "SlideShow" from the Return to Picker menu.

If you are in *KidPix,* select "File->Return to Picker" to open the SlideShow.

SlideShow

3. Begin a SlideShow

To make a slideshow out of a collection of pictures, you need to place each picture into an individual slide of the slideshow.

A truck represents each slide.

If a "truck" is highlighted in blue, it is your currently selected slide.

4. Create A Slide

Create a slide using the "Pick a Picture Tool."

Pick a Picture

You will receive a dialog box to locate your picture.

Locate the folder that contains your Kid Pix pictures: "KPPictures"

Select a picture to add.

Continue adding slides to empty slides.

To add more slides to your slideshow, use the up/down arrows at the bottom right corner of the screen.

How to Create a KidPix SlideShow

5. Add Sounds

To enhance your slideshow, add sounds between slides.
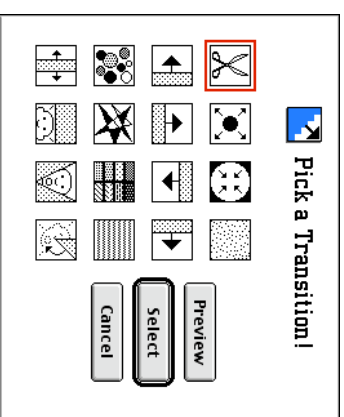

To add sound between two slides:

Add pictures to two adjacent slides.

Select the sound tool. [icon] on the first slide.

Choose a sound.

Press Select.

Add Sound

Pick a Sound!

Cancel   Select   Preview

7. Change Slide Timing

Change the timing between individual slides if you want some slides to stay on the screen for a shorter or longer period of time.

Click and drag the "Transition Timer."

The transition time will appear in a box.

0:02

9. Save a SlideShow

Three are three different ways to save a slide show.

Save as a SlideShow. Saving in this format will allow you to make changes to your slideshow. The following is reguired to run a saved slideshow.

1) KidPix Studio installed on a computer.

2) The pictures that make up the slideshow must be in the same folder as the saved slideshow.

Save as QuickTime Movie. You cannot make changes to a QuickTime movie. The following is required to run a QuickTime movie.

1) QuickTime installed on a computer.

Save as a StandAlone. You cannot make changes to a StandAlone SlideShow.

File Edit Goodies Help

New   ⌘N

Open a SlideShow... ⌘O

Save a SlideShow... ⌘S

Save as QuickTime™...

Save as StandAlone...

Return to Picker   ⌘Q

*In order to run a QuickTime movie or a **StandAlone Slideshow**, you do not need the original pictures that make up the KidPix slideshow.*
